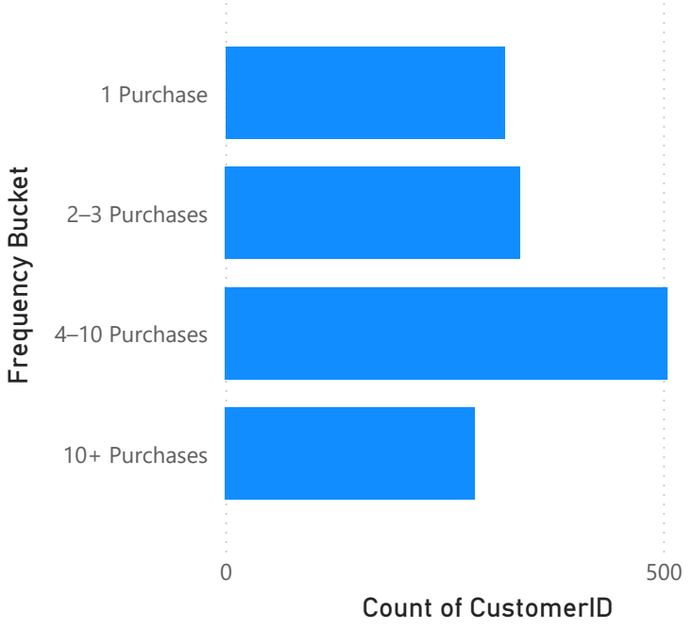
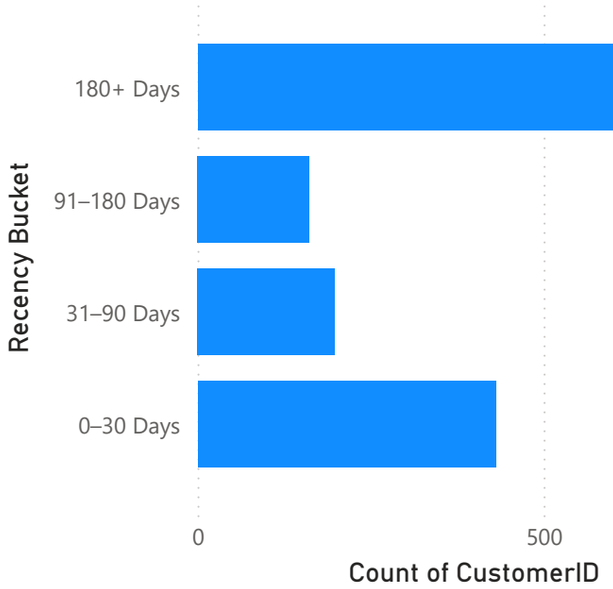
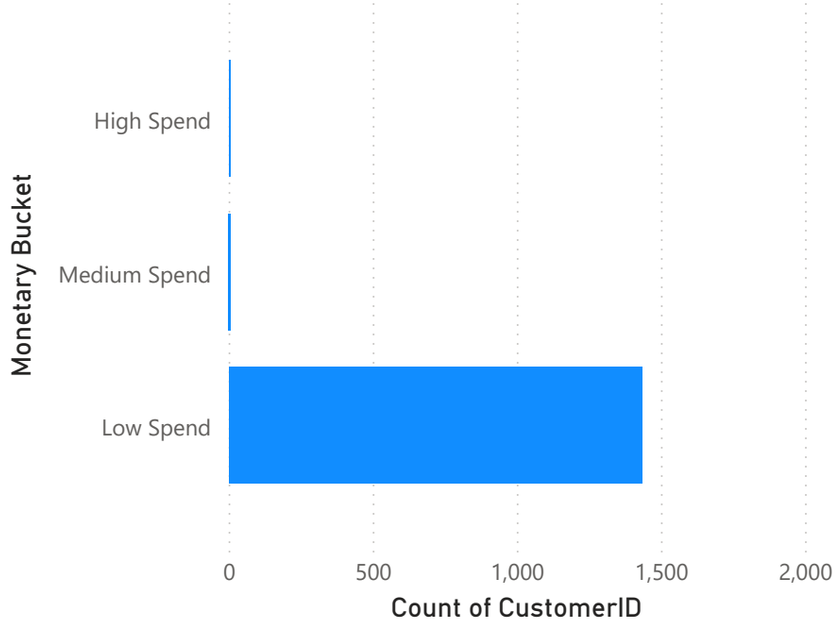
Purchase Frequency Pattern (High-Value Customers)



High-Value Customers Are Mostly Low-Frequency but High-Impact



Spending Behavior (High-Value Customers)



CustomerID	frequency	recency	monetary_value	predicted_purchases_6m	Customer Life Time value (6months)	CLV Segment
15382	6	280	19.72	3.76	73.59	High Value
15677	1	0	19.92	3.31	73.64	High Value
16782	13	355	12.00	6.23	73.66	High Value
14289	6	280	19.39	3.83	73.75	High Value
12871	2	123	34.60	2.11	73.86	High Value

High CLV is driven more by customer longevity and
predicted future purchases than by single-transaction spend.

High-Value customers exhibit distinct behavioral patterns: most purchase infrequently
but contribute high monetary value per transaction, while a smaller subset shows high frequency and recent activity—representing the most stable revenue base.

High-Value Customers Needing Immediate Action

Top CLV Customers

8
Count of Immediate Action Customers

₹ 434.22
Avg CLV (High Value)

A small subset of high-value customers shows high inactivity risk. Targeted retention actions can prevent disproportionate revenue loss.

CustomerID	CLV Segment	Customer Life Time value (6months)	predicted_purchases_6m	monetary_value	frequency	rece
16013	High Value	5,445.80	21.10	267.13	47	
16029	High Value	7,642.85	23.63	334.81	63	
16333	High Value	6,790.34	11.88	591.71	22	
16446	High Value	1,19,040.71	2.20	56,157.50	2	
17450	High Value	11,601.28	20.80	577.30	46	
17857	High Value	5,136.82	10.68	497.76	23	
17949	High Value	16,330.94	20.23	835.86	45	

A small number of high-value customers show prolonged inactivity despite strong historical CLV. Targeted retention actions for these customers can prevent disproportionate revenue loss.
